

## Open a Whole New World of Options With Artificial Grass & Synthetic Turf Solutions!

### Why Artificial Grass?

For some obvious reasons:

- **Virtually Eliminate**
  - Water Used for Irrigation
  - Pesticides
  - Fertilizers
  - Lawn Mowers
  - Edgers
  - Trimmers
  - Re-seeding, Re-sodding
  - Lawn Patches & Repairs
  - Irrigation Systems & Repairs
  - Maintenance Chores
- **Effective Where Natural Grass Can't Easily Thrive**
  - High Traffic Areas
  - Where Water is Not Available
  - Where Water is Limited
  - Short Growing Season
  - Challenging Soils
  - Too Much Shade
  - Not Enough Drainage
  - Severe Slopes
  - Indoors

This attractive, natural looking landscape style, installed along the side of a pool deck will eliminate the hassles of trimmings in the pool!

### Environmentally Sound

- **Increase available water for other needs**
- **Increase air and water quality because of reduced needs for chemicals and gas-powered tools and equipment for maintenance**
  - \* **No MORE Irrigation Run-Off!** \*

### Realistic Styles = Form and Function

- **New styles closely match real grass, so projects blend in, naturally, to the landscape**
- **Increases the ability to USE the area for private & public projects; parks and recreation, daycare, kennels, landscape and leisure sports (golf, bocce, etc)**

## **Environmentally Sound Options With Artificial Grass & Synthetic Turf Solutions!**

**Artificial Grass & Synthetic Turf Give You Environmentally Sound Solutions that:**

- **Increase available water for other needs**
- **Increase air and water quality because of reduced needs for chemicals and gas-powered tools and equipment for maintenance**
- **Architects and builders can control water-shed effectively, decreasing the load on local sewers**
- **Permeable surface installations will increase water reclaimed into local aquifers, adding to water for future use for other needs**
- **Surfaces, both temporarily and permanently installed, provide excellent ground cover to control grey-water, dust and erosion; increasing air and water quality**
- **Many solutions offer recycled or recyclable material options\***

Once a challenging area to maintain, water and keep from eroding, this gently sloped area of the yard, adjacent to patio and pool, was raised and enhanced with a 5 hole putting green and fringe.

**Artificial grass and synthetic turf also benefit your health, safety and the environment for obvious reasons:**

- **Reduced allergens - no grass seed, pollen, clippings or waste**
- **No need for chemical or organic**
  - **Fertilizers or Pesticides**
- **No need to mow, trim or edge**
- **Surfaces can be groomed using "green" cleaners and maintained without loss of use**
- **Available 24/7 - all year round - Providing a safe, durable surface for everyone to use and enjoy**
- **USGBC-LEEDs, EPA, CPSIA, ADA and ASTM Lead (Pb) and Playground Safe Compliant\***
